**COUNCIL REGULATION (EC) No 338/97****of 9 December 1996****on the protection of species of wild fauna and flora by regulating trade therein***Article 1***Object**

The object of this Regulation is to protect species of wild fauna and flora and to guarantee their conservation by regulating trade therein in accordance with the following Articles.

This Regulation shall apply in compliance with the objectives, principles and provisions of the Convention defined in Article 2.

*Article 2***Definitions**

For the purposes of this Regulation:

- (a) ‘committee’ shall mean the Committee on Trade in Wild Fauna and Flora, established under Article 18;
- (b) ‘convention’ shall mean the Convention on International Trade in Endangered Species of Wild Fauna and Flora (Cites);
- (c) ‘country of origin’ shall mean the country in which a specimen was taken from the wild, captive-bred or artificially propagated;
- (d) ‘import notification’ shall mean the notification given by the importer or his agent or representative, at the time of the introduction into the Community of a specimen of a species included in Annexes C or D, on a form prescribed by the Commission in accordance with the procedure laid down in Article 18;
- (e) ‘introduction from the sea’ shall mean the introduction into the Community of any specimen which was taken in, and is being introduced directly from, the marine environment not under the jurisdiction of any State, including the air-space above the sea and the sea-bed and subsoil beneath the sea;
- (f) ‘issuance’ shall mean the completion of all procedures involved in preparing and validating a permit or certificate and its delivery to the applicant;
- (g) ‘management authority’ shall mean a national administrative authority designated, in the case of a Member State, in accordance with Article 13(1)(a) or, in the case of a third country party to the Convention, in accordance with Article IX of the Convention;
- (h) ‘member state of destination’ shall mean the Member State of destination mentioned in the document used to export or re-export a specimen; in the event of introduction from the sea, it shall mean the Member State within whose jurisdiction the place of destination of a specimen lies;
- (i) ‘offering for sale’ shall mean offering for sale and any action that may reasonably be construed as such, including advertising or causing to be advertised for sale and invitation to treat;

▼B

- (j) ‘personal or household effects’ shall mean dead specimens, parts and derivatives thereof, that are the belongings of a private individual and that form, or are intended to form, part of his normal goods and chattels;
- (k) ‘place of destination’ shall mean the place at which at the time of introduction into the Community, it is intended that specimens will normally be kept; in the case of live specimens, this shall be the first place where specimens are intended to be kept following any period of quarantine or other confinement for the purposes of sanitary checks and controls;
- (l) ‘population’ shall mean a biologically or geographically distinct total number of individuals;
- (m) ‘primarily commercial purposes’ shall mean all purposes the non-commercial aspects of which do not clearly predominate;
- (n) ‘re-export from the Community’ shall mean export from the Community of any specimen that has previously been introduced;
- (o) ‘reintroduction into the Community’ shall mean introduction into the Community of any specimen that has previously been exported or re-exported;
- (p) ‘sale’ shall mean any form of sale. For the purposes of this Regulation, hire, barter or exchange shall be regarded as sale; cognate expressions shall be similarly construed;
- (q) ‘scientific authority’ shall mean a scientific authority designated, in the case of a Member State, in accordance with Article 13(1)(b) or, in the case of a third country party to the Convention, in accordance with Article IX of the Convention;
- (r) ‘scientific review group’ shall mean the consultative body established under Article 17;
- (s) ‘species’ shall mean a species, subspecies or population thereof;
- (t) ‘specimen’ shall mean any animal or plant, whether alive or dead, of the species listed in Annexes A to D, any part or derivative thereof, whether or not contained in other goods, as well as any other goods which appear from an accompanying document, the packaging or a mark or label, or from any other circumstances, to be or to contain parts or derivatives of animals or plants of those species, unless such parts or derivatives are specifically exempted from the provisions of this Regulation or from the provisions relating to the Annex in which the species concerned is listed by means of an indication to that effect in the Annexes concerned.

A specimen will be considered to be a specimen of a species listed in Annexes A to D if it is, or is part of or derived from, an animal or plant at least one of whose ‘parents’ is of a species so listed. In cases where the ‘parents’ of such an animal or plant are of species listed in different Annexes, or of species only one of which is listed, the provisions of the more restrictive Annex shall apply. However, in the case of specimens of hybrid plants, if one of the ‘parents’ is of a species listed in Annex A, the provisions of the more restrictive Annex shall apply only if that species is annotated to that effect in the Annex;

- (u) ‘trade’ shall mean the introduction into the Community, including introduction from the sea, and the export and re-export therefrom, as well as the use, movement and transfer of possession within the Community, including within a Member State, of specimens subject to the provisions of this Regulation;

▼B

- (v) ‘transit’ shall mean the transport of specimens between two points outside the Community through the territory of the Community which are shipped to a named consignee and during which any interruption in the movement arises only from the arrangements necessitated by this form of traffic;
- (w) ‘worked specimens that were acquired more than 50 years previously’ shall mean specimens that were significantly altered from their natural raw state for jewellery, adornment, art, utility, or musical instruments, more than 50 years before the entry into force of this Regulation and that have been, to the satisfaction of the management authority of the Member State concerned, acquired in such conditions. Such specimens shall be considered as worked only if they are clearly in one of the aforementioned categories and require no further carving, crafting or manufacture to effect their purpose;
- (x) ‘checks at the time of introduction, export, re-export and transit’ shall mean documentary checks on the certificates, permits and notifications provided for in this Regulation and — in cases where Community provisions so provide or in other cases by representative sampling of the consignments — examination of the specimens, where appropriate accompanied by the taking of samples with a view to analysis or more detailed checks.

*Article 3***Scope**

1. Annex A shall contain:
 - (a) the species listed in Appendix I to the Convention for which the Member States have not entered a reservation;
 - (b) any species:
 - (i) which is, or may be, in demand for utilization in the Community or for international trade and which is either threatened with extinction or so rare that any level of trade would imperil the survival of the species;
 - or
 - (ii) which is in a genus of which most of the species or which is a species of which most of the subspecies are listed in Annex A in accordance with the criteria in subparagraphs (a) or (b)(i) and whose listing in the Annex is essential for the effective protection of those taxa.
2. Annex B shall contain:
 - (a) the species listed in Appendix II to the Convention, other than those listed in Annex A, for which the Member States have not entered a reservation;
 - (b) the species listed in Appendix I to the Convention for which a reservation has been entered;

▼B

- (c) any other species not listed in Appendices I or II to the Convention:
- (i) which is subject to levels of international trade that might not be compatible:
 - with its survival or with the survival of populations in certain countries, or
 - with the maintenance of the total population at a level consistent with the role of the species in the ecosystems in which it occurs:
 - or
 - (ii) whose listing in the Annex for reasons of similarity in appearance to other species listed in Annex A or Annex B, is essential in order to ensure the effectiveness of controls on trade in specimens of such species;
- (d) species in relation to which it has been established that the introduction of live specimens into the natural habitat of the Community would constitute an ecological threat to wild species of fauna and flora indigenous to the Community.

3. Annex C shall contain:

- (a) the species listed in Appendix III to the Convention, other than those listed in Annexes A or B, for which the Member States have not entered a reservation;
- (b) the species listed in Appendix II to the Convention for which a reservation has been entered.

4. Annex D shall contain:

- (a) species not listed in Annexes A to C which are imported into the Community in such numbers as to warrant monitoring;
- (b) the species listed in Appendix III to the Convention for which a reservation has been entered.

5. Where the conservation status of species covered by this Regulation warrants their inclusion in one of the Appendices to the Convention, the Member States shall contribute to the necessary amendments.

Article 4

Introduction into the Community

1. The introduction into the Community of specimens of the species listed in Annex A shall be subject to completion of the necessary checks and the prior presentation, at the border customs office at the point of introduction, of an import permit issued by a management authority of the Member State of destination.

▼B

The import permit may be issued only in accordance with the restrictions established pursuant to paragraph 6 and when the following conditions have been met:

- (a) the competent scientific authority, after considering any opinion by the Scientific Review Group, has advised that the introduction into the Community:
 - (i) would not have a harmful effect on the conservation status of the species or on the extent of the territory occupied by the relevant population of the species;
 - (ii) is taking place:
 - for one of the purposes referred to in Article 8(3)(e), (f) and (g), or
 - for other purposes which are not detrimental to the survival of the species concerned;
- (b) (i) the applicant provides documentary evidence that the specimens have been obtained in accordance with the legislation on the protection of the species concerned which, in the case of import from a third country of specimens of a species listed in the Appendices to the Convention, shall be an export permit or re-export certificate, or copy thereof, issued in accordance with the Convention by a competent authority of the country of export or re-export;
- (ii) however, the issuance of import permits for species listed in Annex A in accordance with Article 3(1)(a) shall not require such documentary evidence, but the original of any such import permit shall be withheld from the applicant pending presentation of the export permit or re-export certificate;
- (c) the competent scientific authority is satisfied that the intended accommodation for a live specimen at the place of destination is adequately equipped to conserve and care for it properly;
- (d) the management authority is satisfied that the specimen is not to be used for primarily commercial purposes;
- (e) the management authority is satisfied, following consultation with the competent scientific authority, that there are no other factors relating to the conservation of the species which militate against issuance of the import permit; and
- (f) in the case of introduction from the sea, the management authority is satisfied that any live specimen will be so prepared and shipped as to minimize the risk of injury, damage to health or cruel treatment.

2. The introduction into the Community of specimens of the species listed in Annex B shall be subject to completion of the necessary checks and the prior presentation, at the border customs office at the point of introduction, of an import permit issued by a management authority of the Member State of destination.

▼B

The import permit may be issued only in accordance with the restrictions established pursuant to paragraph 6 and when:

- (a) the competent scientific authority, after examining available data and considering any opinion from the Scientific Review Group, is of the opinion that the introduction into the Community would not have a harmful effect on the conservation status of the species or on the extent of the territory occupied by the relevant population of the species, taking account of the current or anticipated level of trade. This opinion shall be valid for subsequent imports as long as the abovementioned aspects have not changed significantly;
- (b) the applicant provides documentary evidence that the intended accommodation for a live specimen at the place of destination is adequately equipped to conserve and care for it properly;
- (c) the conditions referred to in paragraph 1(b)(i), (e) and (f) have been met.

3. The introduction into the Community of specimens of the species listed in Annex C shall be subject to completion of the necessary checks and the prior presentation, at the border customs office at the point of introduction, of an import notification and:

- (a) in the case of export from a country mentioned in relation to the species concerned in Annex C, the applicant shall provide documentary evidence, by means of an export permit issued in accordance with the Convention by an authority of that country competent for the purpose, that the specimens have been obtained in accordance with the national legislation on the conservation of the species concerned; or
- (b) in the case of export from a country not mentioned in relation to the species concerned in Annex C or re-export from any country, the applicant shall present an export permit, a re-export certificate or a certificate of origin issued in accordance with the Convention by an authority of the exporting or re-exporting country competent for the purpose.

4. The introduction into the Community of specimens of the species listed in Annex D shall be subject to completion of the necessary checks and the prior presentation of an import notification at the border customs office at the point of introduction.

5. The conditions for the issuance of an import permit as referred to in paragraph 1(a) and (d) and in paragraph 2(a), (b) and (c) shall not apply to specimens for which the applicant provides documentary evidence:

- (a) that they had previously been legally introduced into or acquired in the Community and that they are, modified or not, being reintroduced into the Community; or
- (b) that they are worked specimens that were acquired more than 50 years previously.

▼ M14

6. In consultation with the countries of origin concerned, in accordance with the regulatory procedure referred to in Article 18(2) and taking account of any opinion from the Scientific Review Group, the Commission may establish general restrictions, or restrictions relating to certain countries of origin, on the introduction into the Community:

▼ B

- (a) on the basis of the conditions referred to in paragraph 1(a)(i) or (e), of specimens of species listed in Annex A;
- (b) on the basis of the conditions referred to in paragraph 1(e) or paragraph 2(a), of specimens of species listed in Annex B; and
- (c) of live specimens of species listed in Annex B which have a high mortality rate during shipment or for which it has been established that they are unlikely to survive in captivity for a considerable proportion of their potential life span; or
- (d) of live specimens of species for which it has been established that their introduction into the natural environment of the Community presents an ecological threat to wild species of fauna and flora indigenous to the Community.

The Commission shall on a quarterly basis publish a list of such restrictions, if any, in the *Official Journal of the European Communities*.

▼ M14

7. Where special cases of transshipment, air transfer or rail transport occur following introduction into the Community, derogations from completion of the checks and presentations of import documents at the border customs office at the point of introduction which are referred to in paragraphs 1 to 4 shall be granted by the Commission in order to permit such checks and presentations to be made at another customs office designated in accordance with Article 12(1).

Those measures, designed to amend non-essential elements of this Regulation, by supplementing it, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 18(3).

▼ B*Article 5***Export or re-export from the Community**

1. The export or re-export from the Community of specimens of the species listed in Annex A shall be subject to completion of the necessary checks and the prior presentation, at the customs office at which the export formalities are completed, of an export permit or re-export certificate issued by a management authority of the Member State in which the specimens are located.

2. An export permit for specimens of the species listed in Annex A may be issued only when the following conditions have been met:

- (a) the competent scientific authority has advised in writing that the capture or collection of the specimens in the wild or their export will not have a harmful effect on the conservation status of the species or on the extent of the territory occupied by the relevant population of the species;

▼B

- (b) the applicant provides documentary evidence that the specimens have been obtained in accordance with the legislation in force on the protection of the species in question; where the application is made to a Member State other than the Member State of origin, such documentary evidence shall be furnished by means of a certificate stating that the specimen was taken from the wild in accordance with the legislation in force on its territory;
- (c) the management authority is satisfied that:
 - (i) any live specimen will be so prepared and shipped as to minimize the risk of injury, damage to health or cruel treatment; and
 - (ii) — the specimens of species not listed in Annex I to the Convention will not be used for primarily commercial purposes, or
 - in the case of export to a State party to the Convention of specimens of the species referred to in Article 3(1)(a) of this Regulation, an import permit has been issued;

and

- (d) the management authority of the Member State is satisfied, following consultation with the competent scientific authority, that there are no other factors relating to the conservation of the species which militate against issuance of the export permit.

3. A re-export certificate may be issued only when the conditions referred to in paragraph 2 (c) and (d) have been met and when the applicant provides documentary evidence that the specimens:

- (a) were introduced into the Community in accordance with the provisions of this Regulation;
- (b) if introduced into the Community before the entry into force of this Regulation, were introduced in accordance with the provisions of Regulation (EEC) No 3626/82; or
- (c) if introduced into the Community before 1984, entered international trade in accordance with the provisions of the Convention; or
- (d) were legally introduced into the territory of a Member State before the provisions of the Regulations referred to in (a) and (b) or of the Convention became applicable to them, or became applicable in that Member State.

4. The export or re-export from the Community of specimens of the species listed in Annexes B and C shall be subject to completion of the necessary checks and the prior presentation, at the customs office at which the export formalities are completed, of an export permit or re-export certificate issued by a management authority of the Member State in whose territory the specimens are located.

▼ B

An export permit may be issued only when the conditions referred to in paragraph 2 (a), (b), (c) (i) and (d) have been met.

A re-export certificate may be issued only when the conditions referred to in paragraph 2 (c) (i) and (d) and in paragraph 3 (a) to (d) have been met.

▼ M14

5. Where an application for a re-export certificate concerns specimens introduced into the Community under an import permit issued by another Member State, the management authority must first consult the management authority which issued the permit. The consultation procedures and the cases in which consultation is necessary shall be established by the Commission. Those measures, designed to amend non-essential elements of this Regulation, by supplementing it, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 18(3).

▼ B

6. The conditions for the issuance of an export permit or re-export certificate as referred to in paragraph 2 (a) and (c) (ii) shall not apply to:

- (i) worked specimens that were acquired more than 50 years previously; or
 - (ii) dead specimens and parts and derivatives thereof for which the applicant provides documentary evidence that they were legally acquired before the provisions of this Regulation, or of Regulation (EEC) No 3626/82 or of the Convention became applicable to them.
7. (a) The competent scientific authority in each Member State shall monitor the issuance of export permits by that Member State for specimens of species listed in Annex B and actual exports of such specimens. Whenever such scientific authority determines that the export of specimens of any such species should be limited in order to maintain that species throughout its range at a level consistent with its role in the ecosystem in which it occurs, and well above the level at which that species might become eligible for inclusion in Annex A in accordance with Article 3 (1) (a) or (b) (i), the scientific authority shall advise the competent management authority, in writing, of suitable measures to be taken to limit the issuance of export permits for specimens of that species

▼ M14

- (b) Whenever a management authority is advised of the measures referred to in (a), it shall inform and send comments to the Commission which shall, if appropriate, recommend restrictions on exports of the species concerned in accordance with the regulatory procedure referred to in Article 18(2).

▼B*Article 6***Rejection of applications for permits and certificates referred to in Articles 4, 5 and 10**

1. When a Member State rejects an application for a permit or certificate in a case of significance in respect of the objectives of this Regulation, it shall immediately inform the Commission of the rejection and of the reasons for rejection.
2. The Commission shall communicate information received in accordance with paragraph 1 to the other Member States in order to ensure uniform application of this Regulation.
3. When an application is made for a permit or certificate relating to specimens for which such an application has previously been rejected, the applicant must inform the competent authority to which the application is submitted of the previous rejection.
4. (a) Member States shall recognize the rejection of applications by the competent authorities of the other Member States, where such rejection is based on the provisions of this Regulation.
 - (b) However, this need not apply where the circumstances have significantly changed or where new evidence to support an application has become available. In such cases, if a management authority issues a permit or certificate, it shall inform the Commission thereof, stating the reasons for issuance.

*Article 7***Derogations**

1. *Specimens born and bred in captivity or artificially propagated*
 - (a) Save where Article 8 applies, specimens of species listed in Annex A that have been born and bred in captivity or artificially propagated shall be treated in accordance with the provisions applicable to specimens of species listed in Annex B.
 - (b) In the case of artificially propagated plants, the provisions of Articles 4 and 5 may be waived under special conditions laid down by the Commission, relating to:
 - (i) the use of phytosanitary certificates;
 - (ii) trade by registered commercial traders and by the scientific institutions referred to in paragraph 4 of this Article; and
 - (iii) trade in hybrids.

▼M14

- (c) The criteria for determining whether a specimen has been born and bred in captivity or artificially propagated and whether for commercial purposes, as well as the special conditions referred to in (b), shall be specified by the Commission. Those measures, designed to amend non-essential elements of this Regulation, by supplementing it, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 18(3).

▼B2. *Transit*

- (a) By way of derogation from Article 4, where a specimen is in transit through the Community, checks and presentation at the border customs office at the point of introduction of the prescribed permits, certificates and notifications shall not be required.
- (b) In the case of species listed in the Annexes in accordance with Article 3 (1) and Article 3 (2) (a) and (b), the derogation referred to in (a) shall apply only where a valid export or re-export document provided for by the Convention, relating to the specimens that it accompanies and specifying the destination of the specimens, has been issued by the competent authorities of the exporting or re-exporting third country.

▼M14

- (c) If the document referred to in (b) has not been issued before export or re-export, the specimen must be seized and may, where applicable, be confiscated unless the document is submitted retrospectively in compliance with the conditions specified by the Commission. Those measures, designed to amend non-essential elements of this Regulation, by supplementing it, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 18(3).

3. *Personal and household effects*

By way of derogation from Articles 4 and 5, the provisions therein shall not apply to dead specimens, parts and derivatives of species listed in Annexes A to D which are personal or household effects being introduced into the Community, or exported or re-exported therefrom, in compliance with provisions that shall be specified by the Commission. Those measures, designed to amend non-essential elements of this Regulation, by supplementing it, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 18(3).

4. *Scientific institutions*

The documents referred to in Articles 4, 5, 8 and 9 shall not be required in the case of non-commercial loans, donations and exchanges between scientists and scientific institutions, registered by the management authorities of the States in which they are located, of herbarium specimens and other preserved, dried or embedded museum specimens, and of live plant material, bearing a label, the model for which has been determined in accordance with the regulatory procedure referred to in Article 18(2) or a similar label issued or approved by a management authority of a third country.

▼B*Article 8***Provisions relating to the control of commercial activities**

1. The purchase, offer to purchase, acquisition for commercial purposes, display to the public for commercial purposes, use for commercial gain and sale, keeping for sale, offering for sale or transporting for sale of specimens of the species listed in Annex A shall be prohibited.

▼B

2. Member States may prohibit the holding of specimens, in particular live animals of the species listed in Annex A.

3. In accordance with the requirements of other Community legislation on the conservation of wild fauna and flora, exemption from the prohibitions referred to in paragraph 1 may be granted by issuance of a certificate to that effect by a management authority of the Member State in which the specimens are located, on a case-by-case basis where the specimens:

- (a) were acquired in, or were introduced into, the Community before the provisions relating to species listed in Appendix I to the Convention or in Annex C1 to Regulation (EEC) No 3626/82 or in Annex A became applicable to the specimens; or
- (b) are worked specimens that were acquired more than 50 years previously; or
- (c) were introduced into the Community in compliance with the provisions of this Regulation and are to be used for purposes which are not detrimental to the survival of the species concerned; or
- (d) are captive-born and bred specimens of an animal species or artificially propagated specimens of a plant species or are parts or derivatives of such specimens; or
- (e) are required under exceptional circumstances for the advancement of science or for essential biomedical purposes pursuant to Council Directive 86/609/EEC of 24 November 1986 on the approximation of laws, regulations and administrative provisions of the Member States regarding the protection of animals used for experimental and other scientific purposes⁽¹⁾ where the species in question proves to be the only one suitable for those purposes and where there are no specimens of the species which have been born and bred in captivity; or
- (f) are intended for breeding or propagation purposes from which conservation benefits will accrue to the species concerned; or
- (g) are intended for research or education aimed at the preservation or conservation of the species; or
- (h) originate in a Member State and were taken from the wild in accordance with the legislation in force in that Member State.

▼M14

4. General derogations from the prohibitions referred to in paragraph 1 based on the conditions referred to in paragraph 3, as well as general derogations with regard to species listed in Annex A in accordance with point (ii) of Article 3(1)(b) may be defined by the Commission. Any such derogations must be in accordance with the requirements of other Community legislation on the conservation of wild fauna and flora. Those measures, designed to amend non-essential elements of this Regulation, by supplementing it, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 18(3).

⁽¹⁾ OJ No L 358, 18.12.1986, p. 1.

▼B

5. The prohibitions referred to in paragraph 1 shall also apply to specimens of the species listed in Annex B except where it can be proved to the satisfaction of the competent authority of the Member State concerned that such specimens were acquired and, if they originated outside the Community, were introduced into it, in accordance with the legislation in force for the conservation of wild fauna and flora.

6. The competent authorities of the Member States shall have discretion to sell any specimen of the species listed in Annexes B to D they have confiscated under this Regulation, provided that it is not thus returned directly to the person or entity from whom it was confiscated or who was party to the offence. Such specimens may then be treated for all purposes as if they had been legally acquired.

*Article 9***Movement of live specimens**

1. Any movement within the Community of a live specimen of a species listed in Annex A from the location indicated in the import permit or in any certificate issued in compliance with this Regulation shall require prior authorization from a management authority of the Member State in which the specimen is located. In other cases of movement, the person responsible for moving the specimen must be able, where applicable, to provide proof of the legal origin of the specimen.

2. Such authorization shall:

- (a) be granted only when the competent scientific authority of such Member State or, where the movement is to another Member State, the competent scientific authority of the latter, is satisfied that the intended accommodation for a live specimen at the place of destination is adequately equipped to conserve and care for it properly;
- (b) be confirmed by issuance of a certificate; and
- (c) where applicable, be immediately communicated to a management authority of the Member State in which the specimen is to be located.

3. However, no such authorization shall be required if a live animal must be moved for the purpose of urgent veterinary treatment and is returned directly to its authorized location.

4. Where a live specimen of a species listed in Annex B is moved within the Community, the holder of the specimen may relinquish it only after ensuring that the intended recipient is adequately informed of the accommodation, equipment and practices required to ensure the specimen will be properly cared for.

5. When any live specimens are transported into, from or within the Community or are held during any period of transit or transshipment, they shall be prepared, moved and cared for in a manner such as to minimize the risk of injury, damage to health or cruel treatment and, in the case of animals, in conformity with Community legislation on the protection of animals during transport.

▼M14

6. The Commission may establish restrictions on the holding or movement of live specimens of such species in relation to which restrictions on introduction into the Community have been established in accordance with Article 4(6). Those measures, designed to amend non-essential elements of this Regulation, by supplementing it, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 18(3).

▼B*Article 10***Certificates to be issued**

On receiving an application, together with all the requisite supporting documents, from the person concerned and provided that all the conditions governing their issuance have been fulfilled, a management authority of a Member State may issue a certificate for the purposes referred to in Article 5 (2) (b), 5 (3) and (4), Article 8 (3) and Article 9 (2) (b).

*Article 11***Validity of and special conditions for permits and certificates**

1. Without prejudice to stricter measures which the Member States may adopt or maintain, permits and certificates issued by the competent authorities of the Member States in accordance with this Regulation shall be valid throughout the Community.

2. (a) However, any such permit or certificate, as well as any permit or certificate issued on the basis of it, shall be deemed void if a competent authority or the Commission, in consultation with the competent authority which issued the permit or certificate, establishes that it was issued on the false premise that the conditions for its issuance were met.

(b) Specimens situated in the territory of a Member State and covered by such documents shall be seized by the competent authorities of that Member State and may be confiscated.

3. Any permit or certificate issued in accordance with this Regulation may stipulate conditions and requirements imposed by the issuing authority to ensure compliance with the provisions thereof. Where such conditions or requirements need to be incorporated in the design of permits or certificates, Member States shall inform the Commission thereof.

4. Any import permit issued on the basis of a copy of the corresponding export permit or re-export certificate shall be valid for the introduction of specimens into the Community only when accompanied by the original of the valid export permit or re-export certificate.

▼ M14

5. The Commission shall establish time limits for the issuance of permits and certificates. Those measures, designed to amend non-essential elements of this Regulation, by supplementing it, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 18(3).

▼ B*Article 12***Places of introduction and export**

1. Member States shall designate customs offices for carrying out the checks and formalities for the introduction into and export from the Community, in order to assign to them a customs-approved treatment or use, within the meaning of Regulation (EEC) No 2913/92, of specimens of species covered by this Regulation and shall state which offices are specifically intended to deal with live specimens.

2. All offices designated in accordance with paragraph 1 shall be provided with sufficient and adequately trained staff. Member States shall ensure that accommodation is provided in accordance with relevant Community legislation as regards the transport and accommodation of live animals and that, where necessary, adequate steps are taken for live plants.

3. All offices designated in accordance with paragraph 1 shall be notified to the Commission which shall publish a list of them in the *Official Journal of the European Communities*.

▼ M14

4. In exceptional cases and in accordance with the criteria defined by the Commission, a management authority may authorise the introduction into the Community or the export or re-export therefrom at a customs office other than one designated in accordance with paragraph 1. Those measures, designed to amend non-essential elements of this Regulation, by supplementing it, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 18(3).

▼ B

5. Member States shall ensure that at border crossing-points the public are informed of the implementing provisions of this Regulation.

*Article 13***Management and scientific authorities and other competent authorities**

1. (a) Each Member State shall designate a management authority with primary responsibility for implementation of this Regulation and for communication with the Commission:

(b) Each Member State may also designate additional management authorities and other competent authorities to assist in implementation, in which case the primary management authority shall be responsible for providing the additional authorities with all the information required for correct application of this Regulation.

2. Each Member State shall designate one or more scientific authorities with appropriate qualifications whose duties shall be separate from those of any designated management authority.

▼B

3. (a) Not later than three months before the date of application of this Regulation, Member States shall forward the names and addresses of the designated management authorities, other authorities competent to issue permits or certificates and scientific authorities to the Commission, which shall publish this information in the *Official Journal of the European Communities* within a month.
- (b) Each management authority referred to in paragraph 1 (a) shall, if so requested by the Commission, communicate to it within two months the names and specimen signatures of people authorized to sign permits or certificates, and impressions of the stamps, seals or other devices used to authenticate permits or certificates.
- (c) Member States shall communicate to the Commission any changes in the information already provided, not later than two months after the implementation of such change.

*Article 14***Monitoring of compliance and investigation of infringements**

1. (a) The competent authorities of the Member States shall monitor compliance with the provisions of this Regulation.
 - (b) If, at any time, the competent authorities have reason to believe that these provisions are being infringed, they shall take the appropriate steps to ensure compliance or to instigate legal action.
 - (c) Member States shall inform the Commission and, in the case of species listed in the Appendices to the Convention, the Convention Secretariat of any steps taken by the competent authorities in relation to significant infringements of this Regulation, including seizures and confiscations.
2. The Commission shall draw the attention of the competent authorities of the Member States to matters whose investigation it considers necessary under this Regulation. Member States shall inform the Commission and, in the case of species listed in the Appendices to the Convention, the Convention Secretariat of the outcome of any subsequent investigation.
3. (a) An enforcement group shall be established consisting of the representatives of each Member State's authorities with responsibility for ensuring the implementation of the provisions of this Regulation. The group shall be chaired by the representative of the Commission.
 - (b) The enforcement group shall examine any technical question relating to the enforcement of this Regulation raised by the chairman, either on his own initiative or at the request of the members of the group or the committee.
 - (c) The Commission shall convey the opinions expressed in the enforcement group to the committee.

▼B*Article 15***Communication of information**

1. The Member States and the Commission shall communicate to one another the information necessary for implementing this Regulation.

The Member States and the Commission shall ensure that the necessary steps are taken to make the public aware and inform it of the provisions regarding implementation of the Convention and of this Regulation and of the latter's implementing measures.

2. The Commission shall communicate with the Convention Secretariat so as to ensure that the Convention is effectively implemented throughout the territory to which this Regulation applies.

3. The Commission shall immediately communicate any advice from the Scientific Review Group to the management authorities of the Member States concerned.

4. (a) The management authorities of the Member States shall communicate to the Commission before 15 June each year all the information relating to the preceding year required for drawing up the reports referred to in Article VIII.7 (a) of the Convention and equivalent information on international trade in all specimens of species listed in Annexes A, B and C and on introduction into the Community of specimens of species listed in Annex D. ►**M14** The information to be communicated and the format for its presentation shall be specified by the Commission in accordance with the regulatory procedure referred to in Article 18(2). ◀

▼M23

- (b) On the basis of the information submitted by the Member States referred to in point (a), the Commission services shall make publicly available, before 31 October each year a Union-wide overview on the introduction into, and the export and re-export from, the Union of specimens of the species to which this Regulation applies and shall forward to the Convention Secretariat information on the species to which the Convention applies.
- (c) Without prejudice to Article 20 of this Regulation, the management authorities of the Member States shall, one year before each meeting of the Conference of the Parties to the Convention, communicate to the Commission all the information relating to the relevant preceding period required for drawing up the reports referred to in Article VIII.7 (b) of the Convention and equivalent information on the provisions of this Regulation that fall outside the scope of the Convention. The format for its presentation shall be specified by the Commission by means of implementing acts. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 18(2) of this Regulation.
- (d) On the basis of the information submitted by the Member States referred to in point (c), the Commission shall make publicly available a Union-wide overview on the implementation and enforcement of this Regulation.
- (e) The management authorities of the Member States shall communicate to the Commission before 15 June each year all the information relating to the preceding year for drawing up the annual illegal trade report referred to in CITES Resolution Conf. 11.17 (rev. CoP17).

▼ M14

5. With a view to the preparation of amendments to the Annexes, the competent authorities of the Member States shall forward all relevant information to the Commission. The Commission shall specify the information required, in accordance with the regulatory procedure referred to in Article 18(2).

▼ B

► **C1** 6. Without prejudice to Council Directive 90/313/EEC ◀ of 7 June 1990 on the freedom of access to information on the environment ⁽¹⁾, the Commission shall take appropriate measures to protect the confidentiality of information obtained in implementation of this Regulation.

*Article 16***Sanctions**

1. Member States shall take appropriate measures to ensure the imposition of sanctions for at least the following infringements of this Regulation:

- (a) introduction into, or export or re-export from, the Community of specimens without the appropriate permit or certificate or with a false, falsified or invalid permit or certificate or one altered without authorization by the issuing authority;
- (b) failure to comply with the stipulations specified on a permit or certificate issued in accordance with this Regulation;
- (c) making a false declaration or knowingly providing false information in order to obtain a permit or certificate;
- (d) using a false, falsified or invalid permit or certificate or one altered without authorization as a basis for obtaining a Community permit or certificate or for any other official purpose in connection with this Regulation;
- (e) making no import notification or a false import notification;
- (f) shipment of live specimens not properly prepared so as to minimize the risk of injury, damage to health or cruel treatment;
- (g) use of specimens of species listed in Annex A other than in accordance with the authorization given at the time of issuance of the import permit or subsequently;
- (h) trade in artificially propagated plants contrary to the provisions laid down in accordance with Article 7(1)(b);
- (i) shipment of specimens into or out of or in transit through the territory of the Community without the appropriate permit or certificate issued in accordance with this Regulation and, in the case of export or re-export from a third country party to the Convention, in accordance therewith, or without satisfactory proof of the existence of such permit or certificate;
- (j) purchase, offer to purchase, acquisition for commercial purposes, use for commercial gain, display to the public for commercial purposes, sale, keeping for sale, offering for sale or transporting for sale of specimens in contravention of Article 8;
- (k) use of a permit or certificate for any specimen other than one for which it was issued;

⁽¹⁾ OJ No L 158, 23.6.1990, p. 56.

▼ B

- (l) falsification or alteration of any permit or certificate issued in accordance with this Regulation;
 - (m) failure to disclose rejection of an application for a Community import, export or re-export permit or certificate, in accordance with Article 6 (3).
2. The measures referred to in paragraph 1 shall be appropriate to the nature and gravity of the infringement and shall include provisions relating to the seizure and, where appropriate, confiscation of specimens.
3. Where a specimen is confiscated, it shall be entrusted to a competent authority of the Member State of confiscation which:
- (a) following consultation with a scientific authority of that Member State, shall place or otherwise dispose of the specimen under conditions which it deems to be appropriate and consistent with the purposes and provisions of the Convention and this Regulation; and
 - (b) in the case of a live specimen which has been introduced into the Community, may, after consultation with the State of export, return the specimen to that State at the expense of the convicted person.
4. Where a live specimen of a species listed in Annex B or C arrives at a point of introduction into the Community without the appropriate valid permit or certificate, the specimen must be seized and may be confiscated or, if the consignee refuses to acknowledge the specimen, the competent authorities of the Member State responsible for the point of introduction may, if appropriate, refuse to accept the shipment and require the carrier to return the specimen to its place of departure.

*Article 17***The Scientific Review Group**

1. A Scientific Review Group is hereby established, consisting of the representatives of each Member State's scientific authority or authorities and chaired by the representative of the Commission.
2. (a) The Scientific Review Group shall examine any scientific question relating to the application of this Regulation — in particular concerning Article 4 (1) (a), (2) (a) and (6) — raised by the chairman, either on his own initiative or at the request of the members of the Group or the Committee.
- (b) The Commission shall convey the opinions of the Scientific Review Group to the Committee.

▼ M9*Article 18*

1. The Commission shall be assisted by a committee.
2. Where reference is made to this Article, Articles 5 and 7 of Decision 1999/468/EC ⁽¹⁾ shall apply, having regard to the provisions of Article 8 thereof.

⁽¹⁾ Council Decision 1999/468/EC of 28 June 1999 laying down the procedures for the exercise of implementing powers conferred on the Commission (OJ L 184, 17.7.1999, p. 23).

▼M9

The period laid down in Article 5(6) of Decision 1999/468/EC shall be set at three months. As regards the Committee's tasks referred to in points 1 and 2 of Article 19, if, on the expiry of a period of three months from the date of referral to the Council, the Council has not acted, the proposed measures shall be adopted by the Commission.

▼M14

3. Where reference is made to this paragraph, Article 5a(1) to (4) and Article 7 of Decision 1999/468/EC shall apply, having regard to the provisions of Article 8 thereof.

4. Where reference is made to this paragraph, Article 5a(1) to (4) and (5)(b) and Article 7 of Decision 1999/468/EC shall apply, having regard to the provisions of Article 8 thereof.

The time limits laid down in Article 5a(3)(c) and (4)(b) and (e) of Decision 1999/468/EC shall be set at one month, one month and two months respectively.

Article 19

1. In accordance with the regulatory procedure referred to in Article 18(2), the Commission shall adopt the measures referred to in Article 4(6), Article 5(7)(b), Article 7(4), Article 15(4)(a) and (c), Article 15(5) and Article 21(3).

The Commission shall determine the design of the documents referred to in Articles 4, 5, 7(4) and 10 in accordance with the regulatory procedure referred to in Article 18(2).

2. The Commission shall adopt the measures referred to in Article 4(7), Article 5(5), Article 7(1)(c), (2)(c) and (3), Article 8(4), Article 9(6), Article 11(5) and Article 12(4). Those measures, designed to amend non-essential elements of this Regulation, by supplementing it, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 18(3).

3. The Commission shall lay down uniform conditions and criteria for:

- (a) the issue, validity and use of the documents referred to in Articles 4, 5, 7(4) and 10;
- (b) the use of phytosanitary certificates referred to in Article 7(1)(b)(i);
- (c) the establishment of procedures, where necessary, for marking specimens in order to facilitate identification and ensure enforcement of the provisions.

Those measures, designed to amend non-essential elements of this Regulation, by supplementing it, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 18(3).

▼M14

4. The Commission shall adopt, where necessary, additional measures to implement resolutions of the Conference of the Parties to the Convention, decisions or recommendations of the Standing Committee of the Convention and recommendations of the Convention Secretariat. Those measures, designed to amend non-essential elements of this Regulation, by supplementing it, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 18(3).

5. The Commission shall amend Annexes A to D except in the case of amendments to Annex A which do not result from decisions of the Conference of the Parties to the Convention. Those measures, designed to amend non-essential elements of this Regulation, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 18(4).

▼B*Article 20***Final provisions**

Each Member State shall notify the Commission and the Convention Secretariat of the provisions which it adopts specifically for the implementation of this Regulation and of all legal instruments used and measures taken for its implementation and enforcement.

The Commission shall communicate this information to the other Member States.

Article 21

1. Regulation (EEC) No 3626/82 is hereby repealed.
2. Until the measures provided for in points 1 and 2 of Article 19 have been adopted, Member States may maintain or continue to apply the measures adopted in accordance with Regulation (EEC) No 3626/82 and Commission Regulation (EEC) No 3418/83 of 28 November 1983 laying down provisions for the uniform issue and use of the documents required for the implementation in the Community of the Convention on International Trade in Endangered Species of Wild Fauna and Flora ⁽¹⁾.

▼M14

3. Two months before this Regulation is implemented the Commission, in accordance with the regulatory procedure referred to in Article 18(2) and in consultation with the Scientific Review Group:

▼B

- (a) must check that there is no justification for restrictions on the introduction into the Community of the species listed in Annex C1 to Regulation (EEC) No 3626/82 which are not included in Annex A to this Regulation;
- (b) shall adopt a Regulation amending Annex D into a representative list of species meeting the criteria laid down in Article 3 (4) (a).

⁽¹⁾ OJ No L 344, 7.12.1983, p. 1.

▼B

Article 22

This Regulation shall enter into force on the date of its publication in the *Official Journal of the European Communities*.

It shall apply from 1 June 1997.

Articles 12, 13, 14 (3), 116, 17, 18, 19 and 21(3) shall apply from the date of entry into force of this Regulation.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

▼ **M24***ANNEX***Notes on interpretation of Annexes A, B, C and D**

1. Species included in Annexes A, B, C and D are referred to:
 - (a) by the name of the species; or
 - (b) as being all of the species included in a higher taxon or designated part thereof.
2. The abbreviation ‘spp.’ is used to denote all species of a higher taxon.
3. Other references to taxa higher than species are for the purposes of information or classification only.
4. Species printed in bold in Annex A are listed there in consistency with their protection as provided for by Directive 2009/147/EC of the European Parliament and of the Council ⁽¹⁾ or Council Directive 92/43/EEC ⁽²⁾.
5. The following abbreviations are used for plant taxa below the level of species:
 - (a) ‘ssp.’ is used to denote subspecies;
 - (b) ‘var(s).’ is used to denote variety (varieties); and
 - (c) ‘fa.’ is used to denote forma.
6. The symbols ‘(I)’, ‘(II)’ and ‘(III)’ placed against the name of a species or higher taxon refer to the Appendices to the Convention in which the species concerned are listed as indicated in notes 7, 8 and 9. Where none of these annotations appears, the species concerned are not listed in the Appendices to the Convention.
7. (I) against the name of a species or higher taxon indicates that the species or higher taxon concerned is included in Appendix I to the Convention.
8. (II) against the name of a species or higher taxon indicates that the species or higher taxon concerned is included in Appendix II to the Convention.
9. (III) against the name of a species or higher taxon indicates that it is included in Appendix III to the Convention. In this case the country with respect to which the species or higher taxon is included in Appendix III is also indicated.
10. ‘Cultivar’ means, following the definition of the 8th edition of the *International Code of Nomenclature for Cultivated Plants*, an assemblage of plants that (a) has been selected for a particular character or combination of characters, (b) is distinct, uniform, and stable in these characters, and (c) when propagated by appropriate means, retains those characters. No new taxon of a cultivar can be regarded as such until its category name and circumscription has been formally published in the latest edition of the *International Code of Nomenclature for Cultivated Plants*.

⁽¹⁾ Directive 2009/147/EC of the European Parliament and of the Council of 30 November 2009 on the conservation of wild birds (OJ L 20, 26.1.2010, p. 7).

⁽²⁾ Council Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora (OJ L 206, 22.7.1992, p. 7).

▼ **M24**

11. Hybrids may be specifically included in the Appendices but only if they form distinct and stable populations in the wild. Hybrid animals that have in their previous four generations of the lineage one or more specimens of species included in Annexes A or B shall be subject to this Regulation just as if they were full species, even if the hybrid concerned is not specifically included in the Annexes.

12. When a species is included in Annex A, B or C, the whole animal or plant, whether alive or dead, and all parts and derivatives thereof are also included. Regarding animal species listed in Annex C and plant species listed in Annex B or C, all parts and derivatives of the species are also included in the same Annex unless the species is annotated to indicate that only specific parts and derivatives are included. In accordance with Article 2(t), the symbol '#' followed by a number placed against the name of a species or higher taxon included in Annex B or C designates parts or derivatives which are specified in relation thereto for the purposes of this Regulation as follows:
 - #1 Designates all parts and derivatives, except:
 - (a) seeds, spores and pollen (including pollinia);
 - (b) seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers;
 - (c) cut flowers of artificially propagated plants; and
 - (d) fruits and parts and derivatives thereof of artificially propagated plants of the genus *Vanilla*.

 - #2 Designates all parts and derivatives, except:
 - (a) seeds and pollen; and
 - (b) finished products packaged and ready for retail trade.

 - #3 Designates whole and sliced roots and parts of roots, excluding manufactured parts or derivatives, such as powders, pills, extracts, tonics, teas and confectionery.

 - #4 Designates all parts and derivatives, except:
 - (a) seeds (including seedpods of Orchidaceae), spores and pollen (including pollinia). The exemption does not apply to seeds from Cactaceae spp. exported from Mexico, and to seeds from *Beccariophoenix madagascariensis* and *Dyopsis decaryi* exported from Madagascar;
 - (b) seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers;
 - (c) cut flowers of artificially propagated plants;
 - (d) fruits and parts and derivatives thereof of naturalized or artificially propagated plants of the genus *Vanilla* (Orchidaceae) and of the family Cactaceae;
 - (e) stems, flowers, and parts and derivatives thereof of naturalized or artificially propagated plants of the genera *Opuntia* subgenus *Opuntia* and *Selenicereus* (Cactaceae); and
 - (f) finished products of *Aloe ferox* and *Euphorbia antisyphilitica* packaged and ready for retail trade.

 - #5 Designates logs, sawn wood and veneer sheets.

▼ **M24**

- #6 Designates logs, sawn wood, veneer sheets and plywood.
- #7 Designates logs, wood-chips, powder and extracts.
- #8 Designates underground parts (i.e. roots, rhizomes): whole, parts and powdered.
- #9 Designates all parts and derivatives, except those bearing a label 'Produced from *Hoodia* spp. material obtained through controlled harvesting and production under the terms of an agreement with the relevant CITES Management Authority of [Botswana under agreement No. BW/xxxxxx] [Namibia under agreement No. NA/xxxxxx] [South Africa under agreement No. ZA/xxxxxx]'.
- #10 Designates logs, sawn wood, veneer sheets, including unfinished wood articles used for the fabrication of bows for stringed musical instruments.
- #11 Designates logs, sawn wood, veneer sheets, plywood, powder and extracts. Finished products containing such extracts as ingredients, including fragrances, are not considered to be covered by this annotation.
- #12 Designates logs, sawn wood, veneer sheets, plywood and extracts. Finished products containing such extracts as ingredients, including fragrances, are not considered to be covered by this annotation.
- #13 Designates the kernel (also known as 'endosperm', 'pulp' or 'copra') and any derivative thereof.
- #14 Designates all parts and derivatives, except:
- (a) seeds and pollen;
 - (b) seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers;
 - (c) fruits;
 - (d) leaves;
 - (e) exhausted agarwood powder, including compressed powder in all shapes; and
 - (f) finished products packaged and ready for retail trade, this exemption does not apply to wood chips, beads, prayer beads and carvings.
- #15 Designates all parts and derivatives, except:
- (a) leaves, flowers, pollen, fruits, and seeds;
 - (b) finished products to a maximum weight of wood of the listed species of up to 10 kg per shipment;
 - (c) finished musical instruments, finished musical instrument parts and finished musical instrument accessories;
 - (d) parts and derivatives of *Dalbergia cochinchinensis* which are covered by Annotation #4;
 - (e) parts and derivatives of *Dalbergia* spp. originating and exported from Mexico which are covered by Annotation #6;
- #16 Designates seeds, fruits, and oils;
- #17 Logs, sawn wood, veneer sheets, plywood and transformed wood.

▼ M24

13. The terms and expressions below, used in annotations in these Annexes, are defined as follows:

Extract

Any substance obtained directly from plant material by physical or chemical means regardless of the manufacturing process. An extract may be solid (e.g. crystals, resin, fine or coarse particles), semisolid (e.g. gums, waxes) or liquid (e.g. solutions, tinctures, oil and essential oils).

Finished musical instruments

A musical instrument (as referenced by the Harmonized System of the World Customs Organization, Chapter 92; musical instruments, parts and accessories of such articles) that is ready to play or needs only the installation of parts to make it playable. This term includes antique instruments (as defined by the Harmonized System codes 97.05 and 97.06; Works of art, collectors' pieces and antiques).

Finished musical instrument accessories

A musical instrument accessory (as referenced by the Harmonized System of the World Customs Organization, Chapter 92; musical instruments, parts and accessories of such articles) that is separate from the musical instrument, and is specifically designed or shaped to be used explicitly in association with an instrument, and that requires no further modification to be used.

Finished musical instrument parts

A part (as referenced by the Harmonized System of the World Customs Organization, Chapter 92; musical instruments, parts and accessories of such articles) of a musical instrument that is ready to install and is specifically designed and shaped to be used explicitly in association with the instrument to make it playable.

Finished products packaged and ready for retail trade

Products, shipped singly or in bulk, requiring no further processing, packaged, labelled for final use or the retail trade in a state fit for being sold to or used by the general public.

Powder

A dry, solid substance in the form of fine or coarse particles

Shipment

Cargo transported under the terms of a single bill of lading or air waybill, irrespective of the quantity or number of containers or packages; or pieces worn, carried or included in personal baggage.

10 kg per shipment

For the term '10 kg per shipment', the 10 kg limit should be interpreted as referring to the weight of the individual portions of each item in the shipment made of wood of the species concerned. In other words, the 10 kg limit is to be assessed against the weight of the individual portions of wood of *Dalbergia/Guibourtia* species contained in each item of the shipment, rather than against the total weight of the shipment.

▼ M24**Transformed wood**

Defined by Harmonized System code 44.09. Wood (including strips, friezes for parquet flooring, not assembled), continuously shaped (tongued, grooved, v-jointed, beaded or the like) along any edges, ends or faces, whether or not planed, sanded or end-jointed.

Woodchips

Wood that has been reduced to small pieces.

14. As none of the species or higher taxa of FLORA included in Annex A is annotated to the effect that its hybrids shall be treated in accordance with Article 4(1), this means that artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers of these hybrids are not subject to this Regulation.
15. Urine, faeces and ambergris which are waste products and gained without the manipulation of the animal concerned are not subject to this Regulation.
16. In respect of fauna species listed in Annex D, this Regulation shall apply only to live specimens and whole, or substantially whole, dead specimens except for taxa which are annotated as follows to show that other parts and derivatives are also covered:
 - § 1 Any whole, or substantially whole, skins, raw or tanned.
17. In respect of flora species listed in Annex D, this Regulation shall apply only to live specimens except for taxa which are annotated as follows to show that other parts and derivatives are also covered:
 - § 3 Dried and fresh plants, including, where appropriate; leaves, roots/root-stock, stems, seeds/spores, bark and fruits.
 - § 4 Logs, sawn wood and veneer sheets.

(*) This taxon is referred to as *Ovis ammon* in Annex XIII to Commission Regulation (EC) No 865/2006.

► **C4** ⁽¹⁾ For the exclusive purpose of allowing international trade in fibre from vicuñas (*Vicugna vicugna*) and their derivative products, only if the fibre comes from the shearing of live vicuñas. Trade in products derived from the fibre may only take place in accordance with the following provisions:

- (a) Any person or entity processing vicuña fibre to manufacture cloth and garments must request authorization from the relevant authorities of the country of origin [Countries of origin: The countries where the species occurs, that is, Argentina, Bolivia, Chile, Ecuador and Peru] to use the 'vicuña country of origin' wording, mark or logo adopted by the range States of the species that are signatories to the Convention for the Conservation and Management of the Vicuña.

▼ M24

(b) Marketed cloth or garments must be marked or identified in accordance with the following provisions:

- (i) For international trade in cloth made from live-sheared vicuña fibre, whether the cloth was produced within or outside of the range States of the species, the wording, mark or logo must be used so that the country of origin can be identified. The VICUÑA [COUNTRY OF ORIGIN] wording, mark or logo has the format as detailed below:

This wording, mark or logo must appear on the reverse side of the cloth. In addition, the selvages of the cloth must bear the words VICUÑA [COUNTRY OF ORIGIN].

- (ii) For international trade in garments made from live-sheared vicuña fibre, whether the garments were produced within or outside of the range States of the species, the wording, mark or logo indicated in paragraph (b)(i) must be used. This wording, mark or logo must appear on a label in the garment itself. If the garments are produced outside of the country of origin, the name of the country where the garment was produced should also be indicated, in addition to the wording, mark or logo referred to in paragraph (b)(i).

(c) For international trade in handicraft products made from live-sheared vicuña fibre produced within the range States of the species, the VICUÑA [COUNTRY OF ORIGIN] - ARTESANÍA wording, mark or logo must be used as detailed below:

(d) If live-sheared vicuña fibre from various countries of origin is used for the production of cloth and garments, the wording, mark or logo of each of the countries of origin of the fibre must be indicated, as detailed in paragraphs (b)(i) and (ii).

(e) All other specimens shall be deemed to be specimens of species listed in Appendix I and the trade in them shall be regulated accordingly. ◀

- (²) All species are listed in Appendix II to the Convention except *Balaena mysticetus*, *Eubalaena* spp., *Balaenoptera acutorostrata* (except population of West Greenland), *Balaenoptera bonaerensis*, *Balaenoptera borealis*, *Balaenoptera edeni*, *Balaenoptera musculus*, *Balaenoptera omurai*, *Balaenoptera physalus*, *Megaptera novaeangliae*, *Orcaella brevirostris*, *Orcaella heinsohni*, *Sotalia* spp., *Sousa* spp., *Eschrichtius robustus*, *Lipotes vexillifer*, *Caperea marginata*, *Neophocaena asiaorientalis*, *Neophocaena phocaenoides*, *Phocoena sinus*, *Physeter macrocephalus*, *Platanista* spp., *Berardius* spp., *Hyperoodon* spp., which are listed in Appendix I. Specimens of the species listed in Appendix II to the Convention, including products and derivatives other than meat products for commercial purposes, taken by the people of Greenland under licence granted by the competent authority concerned, shall be treated as belonging to Annex B. A zero annual export quota is established for live specimens from the Black Sea population of *Tursiops truncatus* removed from the wild and traded for primarily commercial purposes.

- (³) Populations of Botswana, Namibia, South Africa and Zimbabwe (listed in Annex B):

For the exclusive purpose of allowing: (a) trade in hunting trophies for non-commercial purposes; (b) trade in live animals to appropriate and acceptable destinations as defined in Resolution Conf. 11.20 (Rev. CoP18) for Botswana and Zimbabwe and for *in situ* conservation programmes for Namibia and South Africa; (c) trade in hides; (d) trade in hair; (e) trade in leather goods for commercial or non-commercial purposes for Botswana, Namibia and South Africa and for non-commercial purposes for Zimbabwe; (f) trade in individually marked and certified Ekipas incorporated in finished jewellery for non-commercial purposes for Namibia and ivory carvings for non-commercial purposes for Zimbabwe; (g) trade in registered raw ivory (for Botswana, Namibia, South Africa and Zimbabwe whole tusks and pieces) subject to the following: (i) only registered government-owned stocks, originating in the State (excluding seized ivory and ivory of unknown origin); (ii) only to trading partners that have been verified by the Secretariat, in consultation with the Standing Committee, to have sufficient national legislation and domestic trade controls to ensure that the imported ivory will not be re-exported and will be managed in accordance with all requirements of Resolution Conf. 10.10 (Rev. CoP18) concerning domestic manufacturing and trade; (iii) not before the Secretariat has verified the prospective importing countries and the registered government-owned stocks; (iv) raw ivory pursuant to the conditional sale of registered government-owned ivory stocks agreed at CoP12 which are 20,000 kg (Botswana), 10,000 kg (Namibia) and 30,000 kg (South Africa); (v) in addition to the quantities agreed at CoP12, government-owned ivory from Botswana, Namibia, South Africa and Zimbabwe registered by 31 January 2007 and verified by the Secretariat may be traded and despatched, with the ivory in paragraph (g)(iv) above in a single sale per destination under strict supervision of the Secretariat; (vi) the proceeds of the trade are used exclusively for elephant conservation and community conservation and development programmes within or adjacent to the elephant range; and (vii) the additional quantities specified in paragraph (g)(v) above shall be traded only after the Standing Committee has agreed that the above conditions have been met; (h) no further proposals to allow trade in elephant ivory from populations already in Annex B shall be submitted to the Conference of the Parties for the period from CoP14 and ending nine years from the date of the single sale of ivory that is to take place in accordance with provisions in paragraphs (g)(i), (g)(ii), (g)(iii), (g)(vi), and (g)(vii). In addition, such further proposals shall be dealt with in accordance with Decisions 14.77 and 14.78 (Rev. CoP15). On a proposal from the Secretariat, the Standing Committee can decide to cause this trade to cease partially or completely in the event of non-compliance by exporting or importing countries, or in the case of proven detrimental impacts of the trade on other elephant populations. All other specimens shall be deemed to be specimens of species included in Annex A and the trade in them shall be regulated accordingly.

▼ M24

(4) The following are not subject to the provisions of this Regulation:

Fossils;

Coral sand, that is to say, material consisting entirely or in part of finely crushed fragments of dead coral no larger than 2 mm in diameter, not identifiable to the level of genus, and which may also contain, amongst other things, the remains of Foraminifera, mollusc and crustacean shell, and coralline algae;

Coral fragments (including gravel and rubble), that is to say, unconsolidated fragments of broken finger-like dead coral and other material between 2 and 30 mm measured in any direction, not identifiable to the level of genus.

(5) Trade of specimens with source code A is allowed only if specimens traded possess cataphylls.

(6) Artificially propagated specimens of the following hybrids and/or cultivars are not subject to the provisions of this Regulation:

Hatiora x graeseri

Schlumbergera x buckleyi

Schlumbergera russelliana x Schlumbergera truncata

Schlumbergera orssichiana x Schlumbergera truncata

Schlumbergera opuntioides x Schlumbergera truncata

Schlumbergera truncata (cultivars)

Cactaceae spp. colour mutants grafted on the following grafting stocks: *Harrisia 'Jusbertii'*, *Hylocereus trigonus* or *Hylocereus undatus*

Opuntia microdasys (cultivars)

(7) Artificially propagated hybrids of *Cymbidium*, *Dendrobium*, *Phalaenopsis* and *Vanda* are not subject to the provisions of this Regulation, when specimens are readily recognizable as artificially propagated and do not show any signs of having been collected in the wild such as mechanical damage or strong dehydration resulting from collection, irregular growth and heterogeneous size and shape within a taxon and shipment, algae or other epiphyllous organisms adhering to leaves, or damage by insects or other pests; and

(a) when shipped in non flowering state, the specimens must be traded in shipments consisting of individual containers (such as cartons, boxes, crates or individual shelves of CC-containers) each containing 20 or more plants of the same hybrid; the plants within each container must exhibit a high degree of uniformity and healthiness; and the shipment must be accompanied by documentation, such as an invoice, which clearly states the number of plants of each hybrid; or

(b) when shipped in flowering state, with at least one fully open flower per specimen, no minimum number of specimens per shipment is required but specimens must be professionally processed for commercial retail sale, e.g. labelled with printed labels or packaged with printed packages indicating the name of the hybrid and the country of final processing. This should be clearly visible and allow easy verification.

Plants not clearly qualifying for the exemption must be accompanied by appropriate CITES documents.

(8) Commission Regulation (EC) No 865/2006 of 4 May 2006 laying down detailed rules concerning the implementation of Council Regulation (EC) No 338/97 on the protection of species of wild fauna and flora by regulating trade therein (OJ L 166, 19.6.2006, p. 1).

(9) Artificially propagated specimens of cultivars of *Cyclamen persicum* are not subject to the provisions of this Regulation. However, the exemption does not apply to such specimens traded as dormant tubers.

(10) Artificially propagated hybrids and cultivars of *Taxus cuspidata*, live, in pots or other small containers, each consignment being accompanied by a label or document stating the name of the taxon or taxa and the text 'artificially propagated', are not subject to the provisions of this Regulation.
