#### PART 2

#### "SCHEDULE 3

Regulation 3

#### Annex III to the Waste Directive

Properties of waste which render it hazardous"

H1	"Explosive": substances and preparations which may explode under the effect of flame or which are more sensitive to shocks or friction than dinitrobenzene.
H2	"Oxidizing": substances and preparations which exhibit highly exothermic reactions when in contact with other substances, particularly flammable substances.
H3—A	"Highly flammable"
	— liquid substances and preparations having a flash point below 21°C (including extremely flammable liquids), or
	— substances and preparations which may become hot and finally catch fire in contact with air at ambient temperature without any application of energy, or
	— solid substances and preparations which may readily catch fire after brief contact with a source of ignition and which continue to burn or be consumed after removal of the source of ignition, or
	— gaseous substances and preparations which are flammable in air at normal pressure, or
	— substances and preparations which, in contact with water or damp air, evolve highly

flammable	gases	in	dangerous	3
quantities.				

H3—B "Flammable": liquid

substances and preparations having a flash point equal to or greater than 21°C and less than

or equal to 55°C.

H4 "Irritant": non-corrosive

substances and preparations which, through immediate, prolonged or repeated contact with the skin or mucous membrane, can cause

inflammation.

H5 "Harmful": substances and

preparations which, if they are inhaled or ingested or if they penetrate the skin, may involve

limited health risks.

H6 "Toxic": substances and

preparations (including very toxic substances and preparations) which, if they are inhaled or ingested or if they penetrate the skin, may involve serious, acute or chronic health

risks and even death.

H7 "Carcinogenic": substances

and preparations which, if they are inhaled or ingested or if they penetrate the skin, may induce cancer or increase its

incidence.

H8 "Corrosive": substances

and preparations which may destroy living tissue on

contact.

H9 "Infectious": substances and

preparations containing viable micro-organisms or their toxins which are known or reliably believed to cause disease in man or other living organisms.

H10 "Toxic for reproduction":

substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may induce nonhereditary congenital malformations or increase their

incidence.

H11 "Mutagenic": substances and

preparations which, if they are inhaled or ingested or if they penetrate the skin, may induce hereditary genetic defects or increase their incidence.

H12 Waste which releases toxic

or very toxic gases in contact with water, air or an acid.

H13(\*) "Sensitizing": substances and

preparations which, if they are inhaled or if they penetrate the skin, are capable of eliciting a reaction of hypersensitization such that on further exposure to the substance or preparation, characteristic adverse effects

are produced.

(\*) As far as testing methods are available.

H14 "Ecotoxic": waste which

presents or may present immediate or delayed risks for one or more sectors of the

environment.

H15 Waste capable by any means,

after disposal, of yielding another substance, e.g. a leachate, which possesses any of the characteristics above.

#### Notes

- 1. Attribution of the hazardous properties "toxic" (and "very toxic"), "harmful", "corrosive", "irritant", "carcinogenic", "toxic to reproduction", "mutagenic" and "ecotoxic" is made on the basis of the criteria laid down by Annex VI, to Council Directive 67/548/EEC of 27 June 1967 on the approximation of laws, regulations and administrative provisions relating to the classification, packaging and labelling of dangerous substances.
- **2.** Where relevant the limit values listed in Annex II and III to Directive 1999/45/EC of the European Parliament and of the Council of 31 May 1999 concerning the approximation of laws, regulations and administrative provisions of the Member States relating to the classification, packaging and labelling of dangerous preparations shall apply.

#### **Test methods**

The methods to be used are described in Annex V to Directive 67/548/EEC and in other relevant CEN-notes.

HAZARDOUS WASTE (WALES) REGULATIONS 2005 RHEOLIADAU GWASTRAFF PERYGLUS (CYMRU) 2005

#### **EXPLANATORY NOTE**

(This note is not part of the Regulations)

These Regulations are supplementary to the Waste (England and Wales) Regulations 2011 ("the England and Wales Regulations"). They make amendments to several Welsh statutory instruments for the purposes of transposing, in relation to Wales, Directive 2008/98/EC of the European Parliament and of the Council on waste (OJNo. L 312, 22.11.2008, p.3). They also revoke, for the same purpose, one Welsh statutory instrument.

A full impact assessment of the effect that the provisions of the England and Wales Regulations and these Regulations will have on business, the voluntary sector and the public sector is available from the Waste Programme, Department for Environment, Food and Rural Affairs, Ergon House, Horseferry Road, London SW1P 2AL.

Changes to legislation:
There are currently no known outstanding effects for the The Waste (Miscellaneous Provisions)
(Wales) Regulations 2011.
